The AI Wave in 2026

Just in the last three weeks...

Middle East Conflict.

More LLM Models.

Robotics advances – Lunar New Year Displays, MWC

Partnerships Changing

MWC announcements – Agents, Robots, Sovereign

Regional Developments – Vietnam Legislation and

Strategy, Malaysia AIDCs

Low Altitude Economy (LAE) and the Future of 6G

The data points today

\$122.8B

The GenAI software market in 2030 -
Agentic AI will be
\$41.8BN

\$1.6TN

Capex on data centers
will be just shy of \$1.6TN
by 2030

50%

AI traffic on networks
will account for 50% by
2030

x2

AI training compute
requirement is doubling
roughly every five
months

1 in 3 Organizations
already have AI in
production today.

Between 30% and 50% of
AI workloads are being
targeted to run
on-premises.

The Most Important KPI?
Time to Value.

But how do we price an AI
project?
Outcomes

Trevor Clarke, Chief Analyst, Omdia

83% of the world's
business data sits on
premises

Trevor Clarke, Chief Analyst, Omdia

Physical AI has only just begun

(self driving, drones, robotics)

Cyber Security in 2026

Global cybersecurity spending to reach \$311bn in 2026

South Korea cybersecurity spending will reach \$1.25bn

Organizations and Their Cyber Tools

3 out of 4

have more than 20
standalone tools

82%

increased standalone
tools in the past 12
months

71%

Intend to consolidate
in the next 12 months

The complexity and speed of the cyber security market is driving many individuals to burnout or suffer serious fatigue in their role. We predict the health and wellbeing of the human component of our teams will be one of the top challenges CISOs and CxOs face in the next three years.

Tools deployed for AI

The Cybersecurity Partner 500

Revenue: \$142.0bn

% of revenue

How fast can you move?
How good is your
balance?
